Transform Your Thinking

Traditional Thinking

- Obese
- Elderly
- Smoker
- Sedentary
- Diabetes
- Chronic Illness
- Non-Compliant
- No English
- Supportive Family

New Perspective

“Something just wasn’t right”

Severe Pain, Increased Nausea, Swelling

August 19th - Doctor makes a 2 inch opening

Sepsis, Pseudomonas, MRSA, VRE, Necrotizing Fasciitis

Safe Care is strategic, deliberate, and uses evidence informed practices to protect patients and staff

Inspire a culture committed to infection prevention and control.

What's wrong with this picture ?

“Quality care is never an accident.”

What You Do Matters!

No preventable infections for patients Ever!

Now More Than Ever Patients Need You!

Patient's lives are forever changed following infection

- 2 x survivor of sepsis and necrotizing fasciitis
- 7 surgeries
- 9 blood transfusions
- 9 of strongest antibiotics
- Open draining abdomen x3 years
- Home care /dressing changes
- 5 months of daily hyperbaric oxygen chamber treatment
- Physio x 6 years
- Weekly Doctors appointments x7 years

\$3,000,000 in medical bills

Every department is part of your Infection Prevention Team.

Will you coach them to victory?

**TAKE THE
LEAD**

**NO Infections
In our facility!**

Set the cultural tone.

We must promote EXCELLENCE in the Mundane
